

# Vantage PRO2™ INSTALLATION DIAGRAM

## Wireless Repeater Combination Network (Multiple Stations, Multiple Repeaters)

This diagram illustrates how a Vantage Pro2™ Console can receive data from up to eight different transmitting stations. In this arrangement, a Vantage Pro2 sensor suite is transmitting data to a Vantage Pro2 console via a daisy chain of three Wireless Repeaters. At the same time, the Wireless Repeaters are receiving and relaying data to the console from a collection of wireless instruments including a Leaf and Soil Moisture Station, an Anemometer Transmitter Kit, a Temperature/Humidity Station, and a standalone Temperature Station with a Stainless Steel Temperature Probe.
