

SHIELDED 4-CONDUCTOR CABLE, 100' (30 M)

7895-100

INSTALLATION

Use the Shielded 4-Conductor Cable with the INDUSTRIAL version of the Anemometer. The Shielded 4-Conductor Cable includes waterproof crimp-style splice connectors.

SPECIFICATIONS

Use the chart below to determine your maximum cable length. Cable length affects the accuracy of data transmitted from the Anemometer to the Sensor Interface Module. We recommend you stay within the maximum ranges as described below.

STATION	FROM	TO	MAXIMUM CABLE LENGTH
GroWeather, Energy, or Health EnviroMonitor [®] (industrial)	Anemometer	Sensor Interface Module	Maximum is 250' (76 m)
